DETAILED ACTION

1. Claims 1 through 4, 6 and 7 are pending. Claims 1 through 4 have been amended. Claim 5 has been canceled. Claims 6 and 7 have been newly added. Applicant's claim to foreign priority of application JAPAN 2004-053336 filed February 27, 2004 is acknowledged. Applicant's amendments and arguments filed April 28, 2009 have been entered and carefully considered.

Prior Rejections

2. With regard to the prior rejection of claims 1 through 5 under 35 U.S.C. 103(a), Applicants have canceled claim 5 outright and have argued that the methyl ester is not an obvious variant of the ethyl ester in view of its markedly superior arthropod controlling activity (KT50 of 0.7 min rather than 6.1 min). Applicants argument has been found persuasive. Therefore, the rejection of claims 1 through 4 as obvious over Elliott et al. is hereby withdrawn.

3. With regard to the prior rejection of claims 3 through 5 under the first paragraph of 35 U.S.C. 112, Applicants have canceled claim 5 outright, and have amended claims 3 and 4 to recite the composition as arthropod-controlling and the method for controlling arthropods. Claims 3 and 4, however, stand rejected for reasons of record. Arthropod is broad phylum inclusive of insects. Arthropods also included, for example, crabs, lobsters, crayfish and shrimp, none of which have been shown to suffer the controlling affects the formula (1) compound. Therefore, the rejection of claims 3 and 4 is maintained for reasons of record.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
6. Claim 2 limits the configuration of each of the position 1 and position 3 substituents of the cyclopropane ring of the claimed formula (1) compound to trans configurations. However, only the position 3 substituent is structurally capable of having a cis or trans configuration. The 5-benzyl-3-furylmethylcarboxylate moiety at position 1 is not capable of either a cis or a trans configuration. Prior to its amendment, claim 2 limited the configuration of the position 1 and position 3 substituents relative to one another, not the configuration of each alone. Claim 2 must be corrected to recite the proper stereochemistry of the claimed formula (1) compound.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
